OM-02 Display Organization Path

Purpose

The purpose of this job aid is to explain how to use transaction Z_OrgPath to show logically grouped organizational units.

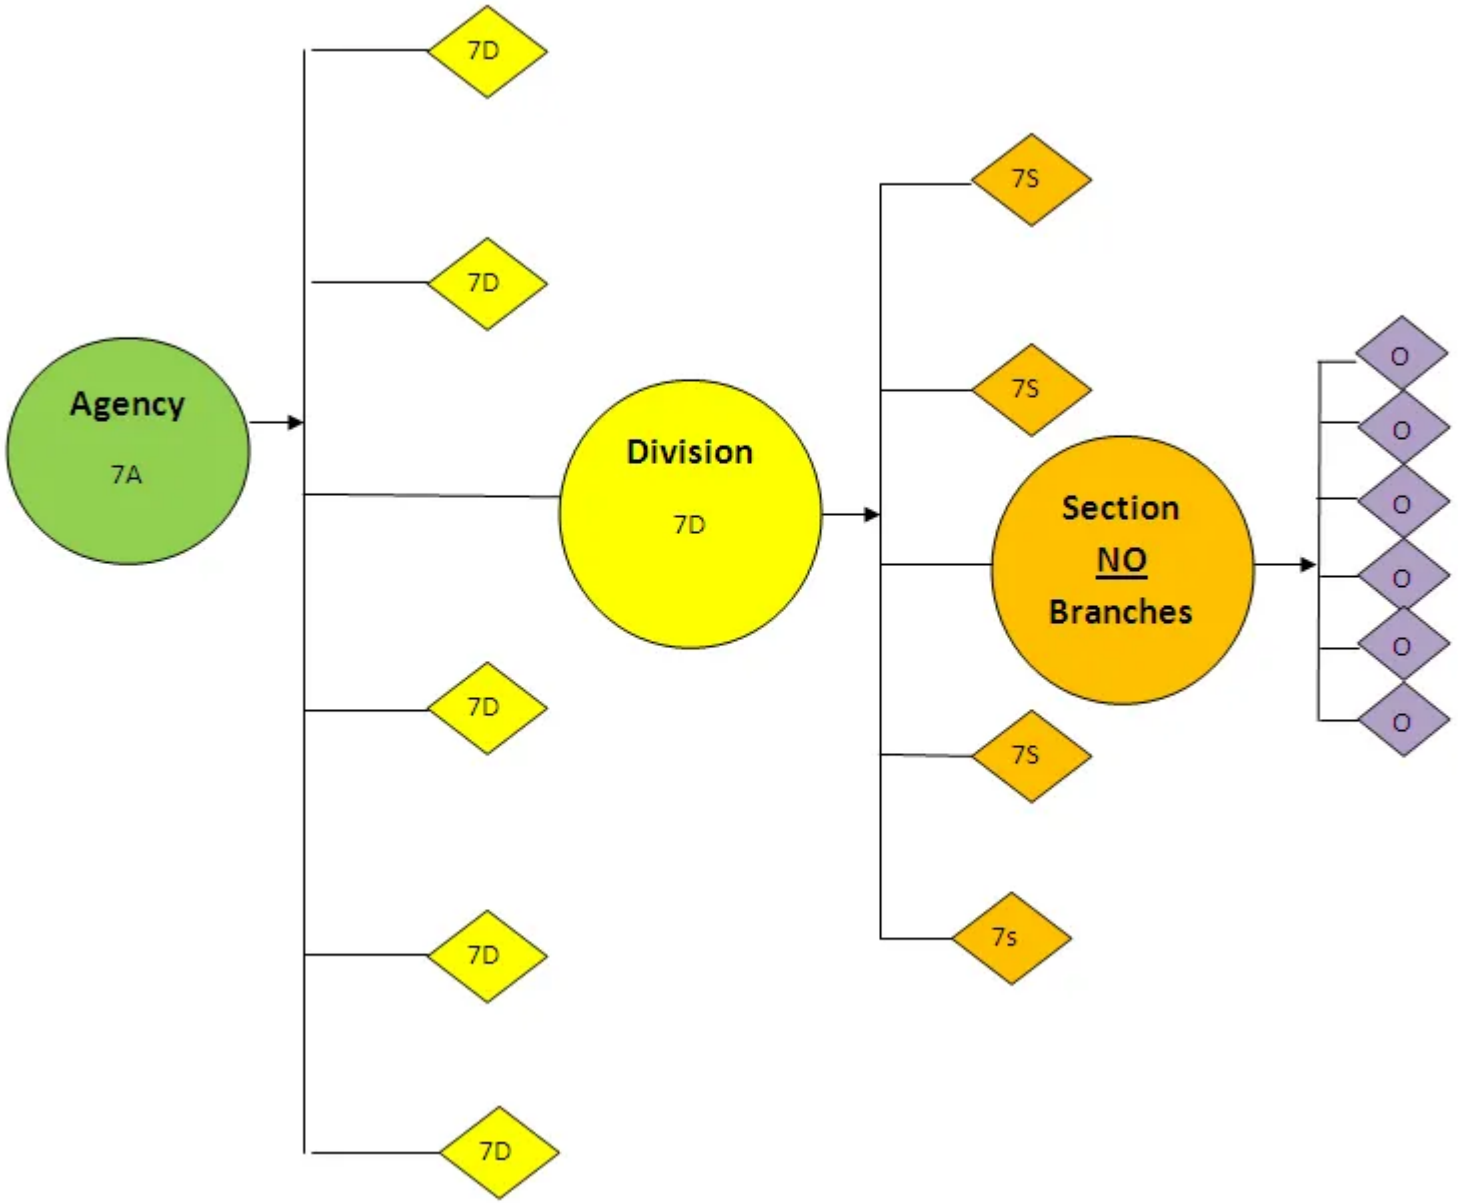
There are five OM Objects that create a new Organizational Path while leaving your agency’s Organizational Structure intact. These OM objects logically group organization units into the following categories:

- Agency (7A)
- Division (7D)
- Section with Branches (7L)
- Section without Branches (7S)
- Branch (7B)

Structure without Branches

This type of structure is used primarily by smaller agencies or agencies with a less complex Org Structure.

Image



Structure with Branches

This type of structure is used primarily by larger agencies or agencies with a more complex Org Structure. However, any agency requiring a more detailed breakdown can use this object.

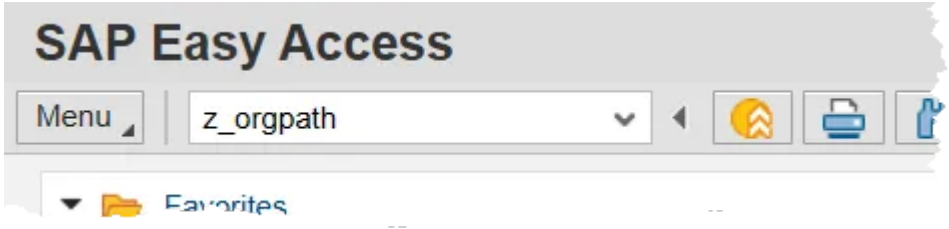
Process

There are 3 steps to complete this process.

Step 1. Type **z_orgpath** in the Command field and press **Enter**.

Image



Step 2. Add data to the **Object Type** and **Object ID** fields. If unsure of the type or ID, use the matchcode to view a list from which to select.

Note: The **Object ID** match code pop-up results are filtered by the value that is input into the **Object Type** field.

Step 3. Click the **Execute** button.

This selection will start the display at the selected **Object Type** level and display all subordinate objects as well as the Organizational Units that belong to them.

This display is an **Agency using Sections (no Branches)**.
