

GEN-05 Schedule Reports and Manage Report Output

Purpose

The purpose of this Quick Reference Guide (**QRG**) is to explain how to schedule reports to run automatically in the North Carolina Financial System (**NCFS**) Cash Management System.

Introduction

The purpose of this Quick Reference Guide is to explain how to schedule reports to run automatically in the North Carolina Financial System. This also covers how to schedule report output.

Scheduling is a very important feature for any reporting system. It enables you to schedule long-running reports to be run when the system load is lowest or to have frequently used reports delivered to your email daily, weekly, hourly, or monthly.

NCFS is configured with a Report Scheduler by default.

Schedule a Report: Overview

Reports can be scheduled to run from different work areas. However, the process remains the same. There are 2 steps to complete this process.

Step 1. From Home > Tools > Reports and Analytics

Image

Step 2. From Home > Financial Reporting Center

Image

Schedule a Report - Tasks

There are 3 steps to complete this process.

Step 1. Select a **Report**. Parameter choices appear.

Image

The screenshot displays the NCFS (North Carolina Financial Services) interface for the FBR Deposits Report. The header features the NCFS logo and navigation icons. The main content area includes a search bar for the report, a filter section with dropdowns for Agency and Journal Status, and date pickers for Journal Creation - From Date and Journal Creation - To Date. An Apply button is located next to the date pickers. A toolbar on the right contains icons for refresh, list, export, settings, and help. A red box highlights the filter section, and another red box highlights the toolbar.

Apply

FBR Deposits XLS Templa...

Refresh List Export Settings Help

Step 2. From the toolbar on the right, click on the **Actions** icon. Then select **Schedule**.

Image

Step 3. The **Schedule Report Job** page contains four tabs to define the options for your report job:

- General
- Output
- Schedule

- Notification

1. General Tab

The **Schedule Report Job** page activates the **General** tab by default.

Leave the default selected parameters as they are or change them to suit your requirement.

Note: Many FBR pre-built reports now have 'Current' and 'Prior' as valid parameter values for Accounting Period.

2. Output Options Tab

On the **Schedule Report Job** page, click the **Output** tab.

1. The tab has two sections: **Output and Destination**. You can accept the default values in each section or update them, based on your needs.
2. The Output Table creates multiple outputs for one or more layouts by using a combination of output format, locale, time zone, and calendar.
3. In the Destination section, you can enter an email address. To deliver a report to multiple destinations, click Add Destination and continue adding destinations as needed.

Image

The screenshot shows a web-based configuration interface for a report. At the top, there's an 'Overview' section with tabs for 'General', 'Output', 'Schedule', and 'Notification'. The 'Output' tab is selected and highlighted with a red box. Below the tabs, there are checkboxes for 'Make Output Public', 'Save Data for Republishing' (checked), and 'Compress output prior to delivery'. A red box highlights the 'Output' section header. Below this is a table with columns: Name, Layout, Format, Locale, Timezone, Calendar, and Save Output. The table has one row: 'Output1', 'FBR Deposits XLS Temp', 'Excel (*.xls)', 'English (United States)', '(UTC-05:00) New York - Eastern Time (ET)', 'Gregorian', and a checked 'Save Output' checkbox. Below the table is the 'Destination' section, also highlighted with a red box. It contains a 'Destination Type' dropdown set to 'Email' (highlighted with a red box) and an 'Add Destination' button. Below this is an email configuration form with fields for 'To' (Username@oc.nc.gov), 'Cc', 'Reply to', and 'Subject' (Daily Deposit Report). There are also checkboxes for 'Request Delivery Status Notification' and 'Request Read Receipt'.

- When running any report, always use the default Destination Type: Email.
- Please do not click on the dropdown and do not select 'Printer'. If you select 'Printer' option, it MAY let you select one of the Check Printers, which will cause additional issues.
- After report completion, you can **download the report to laptop and print from your laptop to local printer**.

NOTE: If the output file is too big to send to the email destination, you will need to click on Output1 link and the report will be downloaded. From your Downloads folder, you may select this output for printing. Navigation steps are detailed in the Managing Report Output section of this QRG.

3. **Schedule Options Tab**

On the **Schedule Report Job** page, click the **Schedule** tab.

1. Select **Frequency** options that meet your specific timing requirements. For example, you might want to generate reports every Friday, or every morning, or according to some other date pattern.
2. Once
3. Hourly
4. Minute
5. Daily
6. Weekly
7. Monthly
8. Annually
9. On specific dates (Use the date selectors to specify the start and end dates.)

This will cause every other day, week 1 will run M/W/F, week 2 will run T/Th. If you need every M/W/F, run 3 scheduled reports set weekly for M, W, and F.

4. Notification Tab

On the **Schedule Report Job** page, click the **Notification** tab.

- A notification is a message that indicates that a job has finished processing. NCFS supports four notification statuses to which you can subscribe. They are all optional.

- Report completed
- Report completed with warnings
- Report failed
- Report skipped

Image

The screenshot shows the 'Notification' tab of a report configuration interface. The 'General' section at the top indicates the report was created by 'training60', has a name of '/Custom/FBR Custom/Report/Cash Management and Treasury/FBR Deposits Report/FBR Deposits Report.xdo', and is scheduled to start on 'Apr 7, 2021 3:01:37 PM' recurring daily. On the right, there are fields for 'Destination Email' and 'Notification Email', with 'Return' and 'Submit' buttons below them. The 'Notification' tab is selected, showing options to 'Notify By' (Email selected) and 'Email Address' (Username@osc.nc.gov). Under the 'When' section, four notification events are listed, all of which are checked: 'Report completed', 'Report completed with warnings', 'Report failed', and 'Report skipped'.

This invokes the *Submit Job* dialog box with confirmation details for you to review. The confirmation details include a summary of the job, such as parameters, schedule, output, and notification.

Enter a name for this job and click **OK**. A confirmation message will appear.

Image

Congratulations! You have successfully scheduled a report!

Using the Actions Menu

The Actions menu provides more actions that you can take on the report.

Browse Catalog > Open (desired report) > Actions icon (gears)

Image

Image

- **Export** exports the report to Microsoft Excel (NCFS default).
- **Send** launches a simplified version of the **Schedule Report Job** page - where you can select the output, destination, and notification options, but you cannot Schedule the Report. Basically, it allows you to immediately email the report.
- **Schedule** creates a job to run and distribute the report, as documented in the beginning of this job aid.

Image

- **Jobs** enables you to view and manage currently scheduled jobs for this report.
- **Job History** enables you to view completed and running report jobs.
- **Republish from History** enables you to select a previously scheduled, completed job and specific output for viewing in the report viewer.
- **Share Report Link** enables you to generate a link that you can copy and reuse, based on the report that you are currently viewing. When you select an option, a dialog displays the URL to the report.

Image

- Current Page displays the current page as shown.
- No Header displays the current report without the BI Publisher logo, tabs, or navigation path.
- No Parameters displays the current report without the header or any parameter selections. The Actions menu, Export, and View Report menus are still available.
- Document Only displays the URL to the current report document only. No other page information or options are displayed.

Jobs - Manage Report Jobs

The **Manage Report Jobs** page displays information about future scheduled/recurring report jobs and enables you to take actions on these jobs.

From the Actions menu, select Jobs.

Image

Use the **Manage Report Jobs** page to:

- Edit a report job
- Delete a report job
- Suspend/Resume a report job
- View the job details

Image

Note: Use Oracle's online help to obtain more information on this page!

Image

A. **Edit a Job**

- Step 1: Click the **Edit** icon for the job in the results table.
- Step 2: Edit the job details using the **General, Output, Schedule, and Notification** tabs.
- Step 3: Click **Update Job** to save your changes to this job; or, to save the edited job as a new job, click **Submit as New** and enter a name for the new job.

B. **Delete a Job**

- Step 1: Select the job by clicking anywhere in the table row that lists the job information. You can select multiple jobs by clicking additional rows.
- Step 2: Click the **Delete** button.

C. Suspend/Resume a Report Job

- To pause a job:
 - Step 1: Select the job by clicking anywhere in the table row that lists the job information (do not click the job name link).
 - Step 2: Click the **Pause** button. The status of the job changes to Paused.
- To resume a job:
 - Step 1: Select the job by clicking anywhere in the table row of the paused job (do not click the job name link).
 - Step 2: Click the **Resume** button. The status of the job changes

Image

Managing Report Output

After defining the Schedule options, submit the job. Perform the following steps. There are 5 steps to complete this process.

Step 1. Click **Submit**. This invokes the Submit Job dialog box with confirmation details for you to review. The confirmation details include a summary of the job, such as parameters, schedule, output, and notification. Enter a name for this job and click **OK**. A message confirms that the job has been successfully submitted.

Image

Submitting the Job and Reviewing the Confirmation Details

Step 2. To monitor or edit your job, navigate to the **Manage Report Jobs** page. You access the **Manage Report Jobs** page by clicking Home > Report Jobs on the global header. You will check this report job in the next section.

Image

Step 3. To see the results of your job, navigate to the **Report Job History** page. Click Open > Report Job History on the global header. You can see the job on the **Report History** page if it is running or completed. If the job is still active, the job will be listed under Report Jobs.

Increment Date Parameters

You can provide expressions in the report's date parameter fields.

If the scheduled report includes date parameters, when you enter values for the schedule dates, you can't change the date values. Every time a scheduled instance of the report is run, the same date parameters are used. If changing the date parameters is required for each run, you can enter an expression in the date parameter field of the scheduler to calculate the date each time the report job runs.

For example, if you create a schedule for a report that runs every Monday to capture data from the previous week, you need to update the date parameters for the report to increment to the first and last days of the previous week.

Enter one of the following functions using the syntax shown to calculate the appropriate date at the scheduled runtime for the report:

- `{$SYSDATE()$}` - Current date, the system date of the server on which Publisher is running.
- `{$FIRST_DAY_OF_MONTH()$}` - First day of the current month
- `{$LAST_DAY_OF_MONTH()$}` - Last day of the current month
- `{$FIRST_DAY_OF_YEAR()$}` - First day of the current year
- `{$LAST_DAY_OF_YEAR()$}` - Last day of the current year

The date function calls in the parameter values aren't evaluated until the report job is processed by the Scheduler.

You can also enter expressions using the plus sign (+) and minus sign (-) to add or subtract days as follows:

- `{$SYSDATE()+1$}`
- `{$SYSDATE()-7$}`

For this example, to capture data from the previous week, each time the schedule runs, enter the following in the report's date parameter fields:

- Date From: `{$SYSDATE()-7$}`
- Date To: `{$SYSDATE()-1$}`

You can set up the date functions as default parameter values in the data model. In this case, every time a user views the report from the report viewer, the date parameter is calculated according to the expression supplied for the default value.

Note: Numerous FBR pre-built reports now have ‘Current’ and ‘Prior’ as valid parameter values for **Accounting Period**.

Image

The screenshot displays the 'Schedule Report Job' window. At the top, there's a blue header with navigation links: Home, Catalog, Favorites, Dashboards, Create, and Open. Below the header, the 'Overview' tab is active, showing report details: 'General Created by trisupr1', 'Report Name: /Custom/FBR CustomReport/Accounts Payable/NC Payment with COA Detail Report (RPTAP011).nc Payment with COA Detail Report (RPTAP011).rpt', and 'Schedule Start on Nov 8, 2023 4:58:52 PM Resur Daily'. There are 'Return' and 'Submit' buttons on the right. Below the overview, there are tabs for 'General', 'Output', 'Schedule', and 'Notification'. The 'General' tab is selected, showing a 'Report' field with the path '/Custom/FBR CustomReport/Account...'. Under the 'Parameters' section, various fields are listed with dropdown menus: Business Unit (All), Disbursement Bank Account Name (All), * Payment Accounting From Date (10/01/2023), * Payment Accounting To Date (DS15CATE)S, Payment Method (R), Payment Number (All), Agency (All), Budget Fund (All), Account (All), AMO (All), Program (All), Funding Source (All), Parent Project (All), Project (All), Inter Fund (All), Future 1 (All), Future 2 (All), and Future 3 (All).
