

ICT-07 Searching for Transfers

Purpose

The purpose of this Quick Reference Guide (**QRG**) is to provide the Intercompany (IC) Transfer Entry users an overview on how to utilize the North Carolina Financial System (**NCFS**) search capabilities to find information related to the organization's cash transfers.

Introduction and Overview

When NCFS users are searching through intercompany transfers, there are four key search capabilities that make the search process efficient. The four sections discussed in this QRG are the Basic Search, Advanced Search, Adding Additional Fields, and Saving Searches. A basic search allows a search on specific values or names. Advanced Searches allow users to set conditional operators to search on portions of fields or ranges, as well as add additional fields to more refine the search. In addition, users may add additional search criteria to Advanced searches to enhance the search. Saved searches allows the user to keep a copy of the search criteria for later use. Users can create new saved search entries, edit, and delete existing saved search entries. Also, the user can retrieve user-specified or public saved search entries.

Key Terms

- Basic Search
 - A basic search allows a search on specific values or names.

- Advanced Search
 - Advanced searches allow users to set conditional operators to search on portions of fields or ranges, as well as add additional fields to more refine the search.
- Saved Searches
 - Saved searches allow the user to keep a copy of the search criteria for later use.
- Add Search Criteria
 - Adding additional fields or search criteria allows users to see more specific results, spend less time going through search results for needed entries.

Information Needed to Complete this Process

- Batch Number
- Transaction Number
- Transaction Type
- Accounting Date
- Provider
- Receiver
- Transactions Status
- Desired Transfer Entry

Basic Search

The Basic Search functionality allows users to narrow the search results when trying to pull IC transfers. The Basic Search allows users to search based on transfer batch number, transaction type, provider, and receiver among others. Each field has a double asterisk next to it. This means it is a system-required field and at least one of these fields must be completed to pull data.

There are 5 steps to complete this process.

Step 1. Access the **NCFS Homepage** and click the **Intercompany Accounting** icon.

Image

Step 2. Click **Transactions**.

Image

Step 3. Click the **Tasks** icon to open the task list.

Image

Step 4. From the task list, click **Manage Intercompany Inbound Transactions**.

Image

Step 5. The screen displayed below is the Basic Search screen. The Basic Search allows for users to search based on:

- Batch Number
- Transaction Number
- Transaction Type
- Accounting Date
- Provider
- Receiver
- Transaction Status

Image

The screenshot shows the 'Manage Intercompany Inbound Transactions' screen in the NCFS system. The page has a dark blue header with the NCFS logo and navigation icons. Below the header, the title 'Manage Intercompany Inbound Transactions' is displayed. A 'Done' button is in the top right corner. The main section is titled 'Search' and contains a search form. The form has two columns of fields, each marked with a double asterisk (**). The fields are: Batch Number, Transaction Number, Transaction Type, Accounting Date, Provider, Receiver, and Transaction Status. The Accounting Date field has a date picker icon. To the right of the search form, there are tabs for 'Advanced', 'Saved Search', and a dropdown menu for 'All Inbound Transactions'. Below the tabs, a note states '** At least one is required'. At the bottom right of the search form, there are buttons for 'Search', 'Reset', and 'Save...'.

Advanced Search

The Advanced Search allows users to have additional options when trying to complete a search as compared to the Basic Search. Each field has a double asterisk next to it. This means that a system-required field and at least two of these fields must be completed to pull data. The Advanced Search also contains conditional operators. The

most frequently used conditional operators are “Starts with,” “Ends with,” “Equals,” “Does not equal,” “Contains,” and “Does not contain.” “Starts with,” “Ends with,” and “Contains” should be used when some information is known but the complete data is unknown. If the exact information is known, then use “Equals” for a faster response. The only time to use a “Does not Equal” and “Does not Contain” operator is as part of a multiple field search.

There are 4 steps to complete this process.

Step 1. Click **Advanced** to show the Advanced Search Screen.

Image

The screenshot shows the 'Manage Intercompany Inbound Transactions' interface. At the top, there is a blue header with the NCFS logo and navigation icons. Below the header, the title 'Manage Intercompany Inbound Transactions' is displayed. A 'Done' button is in the top right corner. The main section is titled 'Search' and contains several input fields for filtering transactions: 'Batch Number', 'Transaction Number', 'Transaction Type' (a dropdown menu), 'Accounting Date' (with a date picker icon), 'Provider' (a dropdown menu), 'Receiver' (a dropdown menu), and 'Transaction Status' (a dropdown menu). A red box highlights the 'Advanced' button, which is located next to the 'Saved Search' dropdown. Below the search fields, there are 'Search', 'Reset', and 'Save...' buttons. A note at the bottom right states '** At least one is required'.

Step 2. The Screen displayed below is the Advanced Search Screen. The Advanced Search function allows for users to search by:

- Batch Number
- Transaction Number
- Transaction Type

- Accounting Date
- Provider
- Receiver
- Transactions Status
- Additional Information Context

Image

The screenshot shows the 'Manage Intercompany Inbound Transactions' search interface. A red box highlights the search criteria fields. The fields and their operators are:

- Batch Number**: Starts with
- Transaction Number**: Starts with
- Transaction Type**: Equals
- Accounting Date**: Equals
- Provider**: Equals
- Receiver**: Equals
- Transaction Status**: Equals
- Additional Information Context**: Equals

Buttons at the bottom include Search, Reset, Save..., Add Fields, and Reorder. A 'Done' button is in the top right corner.

Step 3. To adjust the conditional operators, click the **Batch Number Operator** box. Once the operator box is selected a *conditional operator's* dropdown appears.

Image

Manage Intercompany Inbound Transactions

Search

**** Batch Number** Contains **Batch Number Operator**

**** Transaction Number** Starts with

**** Transaction Type** Equals

**** Accounting Date** Equals m/d/yy

**** Provider** Equals

**** Receiver** Equals

**** Transaction Status** Equals

Additional Information Context Equals

Basic Saved Search All Inbound Transactions

** At least one is req

Search Reset Save... Add Fields ▼ Reor

Step 4. The dropdown has the following options.

Image

Adding Fields

Adding fields allows users to search on additional fields not included in the basic or advanced searches. Users can add multiples of existing fields to expand the search. For example, a second Provider can be added to search for more than one provider at a time.

There are 2 steps to complete this process.

Step 1. On the *Manage Intercompany Inbound Transactions* screen, click the **Add Fields** dropdown arrow.

Image

The screenshot shows the 'Manage Intercompany Inbound Transactions' interface. At the top, there's a navigation bar with the NCFS logo and a 'Done' button. Below the title, there's a 'Search' section with several filters: 'Batch Number' (Contains), 'Transaction Number' (Starts with), 'Transaction Type' (Equals), and 'Accounting Date' (Equals). A tooltip for 'Batch Number' shows 'Batch Number Operator'. To the right, there are more filters: 'Provider' (Equals), 'Receiver' (Equals), 'Transaction Status' (Equals), and 'Additional Information Context' (Equals). A note says '** At least one is required'. At the bottom right, there are buttons for 'Search', 'Reset', 'Save...', 'Add Fields' (highlighted with a red box), and 'Reorder'.

Step 2. A dropdown arrow appears with various options. Users should select the desired option.

Image

Saving Search

If users frequently execute the same search, using the saving search criteria can save time. The fields that have been added from the previous section can be included in a saved search. Users can save the specific search with terminology specific to transfers.

There are 2 steps to complete this process.

Step 1. In order to create a Saved Search. Users must click **Save** in the bottom right-hand corner of the screen.

Image

The screenshot shows the 'Manage Intercompany Inbound Transactions' search interface. At the top right, there is a 'Done' button. Below the title, there is a 'Search' section with tabs for 'Basic', 'Saved Search', and 'All Inbound Transactions'. The 'Basic' tab is selected. The search criteria are organized into two columns. The left column includes: '** Batch Number' with a 'Contains' dropdown, '** Transaction Number' with a 'Starts with' dropdown, '** Transaction Type' with an 'Equals' dropdown, and '** Accounting Date' with an 'Equals' dropdown and a date format 'm/d/yy'. The right column includes: '** Provider' with an 'Equals' dropdown, '** Receiver' with an 'Equals' dropdown, '** Transaction Status' with an 'Equals' dropdown, and 'Additional Information Context' with an 'Equals' dropdown. A note at the top right of the right column states '** At least one is required'. At the bottom right, there are buttons for 'Search', 'Reset', 'Save...', 'Add Fields', and 'Reorder'. The 'Save...' button is highlighted with a red box.

Step 2. A pop up appears on the screen with the name Create Saved Search. If desired select the **Set as Default** and **Run Automatically** check box.

Image

The screenshot shows the same 'Manage Intercompany Inbound Transactions' search interface as in the previous image, but with a 'Create Saved Search' pop-up dialog box open. The dialog box has a title bar with 'Create Saved Search' and a close button. It contains a text field for '* Name' with the value 'All Inbound Transactions ci'. Below the text field, there are two checkboxes: 'Set as Default' and 'Run Automatically', both of which are currently unchecked. At the bottom of the dialog box, there are 'OK' and 'Cancel' buttons. The background search interface is dimmed.

Wrap Up

The NCFS Search capabilities are designed to make it easier to locate needed information. These capabilities assist users in retrieving and analyzing a large number of intercompany transactions to locate the desired transaction. The conditional operators and saved search functionalities allow for further refinement and efficiencies to accomplish this task.
