

FA-16 Removing Exception and Transaction Lines in Fixed Assets

Purpose

The purpose of this Quick Reference Guide (**QRG**) is to provide a step-by-step explanation on how to Remove Transaction Lines, such as retirement exception lines, from the Fixed Assets dashboard in the North Carolina Financial System (**NCFS**).

Introduction and Overview

This QRG explains how to remove transaction lines and retirement exception lines in NCFS. These steps can be used to delete any transaction line that appears on the Fixed Assets dashboard.

Removing Transaction Lines from the Fixed Assets Dashboard

On the Fixed Assets dashboard, transaction lines are stored and displayed. These lines are in a pending status until changed. The status of “Delete” is used to remove a transaction line. This status only deletes the pending transaction; it does not influence the asset.

To remove a transaction line from the Fixed Assets dashboard, please follow the steps below. There are 10 steps to complete this process.

Step 1. Log in to the NCFS portal with your credentials to access the system.

Step 2. On the **Home** page, under the **Fixed Assets** tab, click the **Assets** app.

Step 3. In this example, the removal of a Retirement Exception line will be presented. This process can be followed for any transaction type or line. On the **Assets** page, click **Exceptions** within the **Retirements** tile.
